

Neurology – 4 weeks

During the 4 week Neurology rotation the students will be expected to spend two weeks in an inpatient neurology ward and two weeks in an outpatient/ambulatory clinic, both under the direct supervision of a neurologist. The following clinical conditions will be expected to be seen by the students and they will be expected to analyze these conditions using the schemes and process worksheets studied in Phase A. Participation in the patient's history, physical exam, differential diagnosis and therapeutic plan will be expected for the core clinical conditions listed:

- Alcohol/substance abuse
- Altered mental status/coma
- Chronic pain
- Dizziness/syncope
- Headache
- Movement disorder/Parkinson's disease
- Multiple sclerosis
- Nervous system tumors
- Neuropathy
- Neuropharmacology
- Seizure/epilepsy
- Stroke

Students will also be expected to successfully complete the following procedure:

- **Lumbar puncture** (participate/mastery, may be completed during the emergency medicine clerkship)
