

Obstetrics/Gynecology – 6 weeks

During the 6 week OB/GYN rotation the students will be expected to spend three weeks in an inpatient/delivery/surgical setting and three weeks in an outpatient OB/GYN clinic, both under the direct supervision of an obstetrician/gynecologist. The following clinical conditions will be expected to be seen by the students and they will be expected to analyze these conditions using the schemes and process worksheets studied in Phase A. Participation in the patient's history, physical exam, differential diagnosis and therapeutic plan will be expected for the core clinical conditions listed:

- Sexual dysfunction (may be male or female, may be encountered during family medicine, or internal medicine clerkships)
- Lesbian, gay, bisexual or transgender patient (may be encountered during family medicine or internal medicine – this is not to be considered a clinical condition, but a critical encounter to ensure awareness and sensitivity to issues specific to this population)
- Abnormal PAP smear
- Breast pain/mass/nipple discharge
- C-section
- Contraception/reproductive options
- Infertility
- Domestic violence/Sexual abuse
- Labor/delivery (normal and complicated)
- GU malignancy
- Hysterectomy
- Menopause
- Menstrual abnormalities/abnormal genital tract bleeding
- Puerperium (normal) and (abnormal)
- Pelvic mass (non-pregnant)
- Pelvic pain (acute/chronic)
- Pregnancy (complicated/high risk)
- Hypertension or diabetes in pregnancy
- Pregnancy (normal), 1st trimester; 2nd trimester
- Pregnancy loss

- Sexually transmitted disease, including screening
- Vaginal discharge
- Infant delivery

Students will also be expected to successfully complete the following procedures:

- **Breast exam** (mastery, may be completed during the family medicine clerkship)
- **Mammogram** (observe)
- **Abdominal or Vaginal Ultrasound** (observe/participate, may be completed during the surgery or emergency medicine clerkship)
- **Delivery of an infant** (observe/participate, uncomplicated vaginal delivery)
- **Cervix biopsy or surgical procedure** (observe)
- **Papanicolaou smear** (mastery)
- **Pelvic examination** (mastery)
- **Peripheral I.V. placement and removal** (participate/mastery), may be completed on any clerkship
- **Rectal exam** (participate, may be completed during the internal medicine, surgery, or emergency medicine clerkships)
- **Urine dipstick interpretation** (participate/mastery),
